

# HRX 075

Hydro-Rain's top performing rotary sprinkler for lawn and garden areas is the HRX 075. Through its broad selection of precision nozzles, the HRX provides industry-leading distribution uniformity for any landscape. Putting water just where you need it - that's the engineering development mission behind the manufacturing of Hydro-Rain's HRX Series Rotors.

## BUILT FOR SPEED FEATURE

- Easy Nozzle Identification**—Numbering system is equal to the flow rate in both standard and low angle nozzles, for hassle free selection.
- Uniform Coverage**—Unprecedented matched precipitation and radius across all nozzles #1 through #4 and low angle series nozzles.
- Easy-to-Match Precipitation Nozzle System**—To achieve best matched precipitation use Nozzle #1 for 90° patterns, #2 for 180° pattern, #3 for 270°, and #4 for 360° arc adjustment.
- Rubber Cover**—Keeps the dirt out of adjustment components.
- Lubricated Gear Assembly**—For years of reliable use.
- Precision Reversing Mechanism**—Provides years of smooth non-delayed forward and reverse rotation.
- Adjustable**—Key adjusts arc from 40 to 360 degrees, and radius can be reduced up to 25 percent.

## MODELS    SKU    DESCRIPTION

|         |       |                                |
|---------|-------|--------------------------------|
| HRX 075 | 01010 | HRX 075 4" Rotor w/Adj Pattern |
|---------|-------|--------------------------------|

## HOW TO SPECIFY

HRX 075 ADJ

| MODEL            | SIZE     | OPT. FEATURES   |
|------------------|----------|-----------------|
| Hydro-Rain Rotor | 3/4" NPT | Nozzle # 1 to 4 |

# HRX 075

## OPERATION RANGE

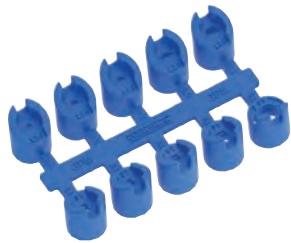

- Radius: 22' to 52' (6.7 to 15.9 m)
- Pressure 30-70 psi (2.1 to 4.8 Bars: 206 to 482 kPa)

## SPECIFICATIONS

- 3/4" FNPT bottom inlet
- Nozzle outlet trajectory is 25 degree standard or 13 degrees low angle

## DIMENSIONS

- Overall Height: 7-3/8' (19 cm)
- Exposed surface diameter: 1-3/4" (4 cm)
- Popup Height: 4" (10 cm)

|               |  |
|---------------|--|
|               | Quarter  |
| 1.0           | L0.5   |
|               | Full   |
| 4.0           | L2.0   |
|               | Half   |
| 2.0           | L1.0   |
|               | Half   |
| 8.0           | 8.0 nozzle is designed for single-head field and pasture applications: sprays 52 ft. at 60 PSI |
| Three-Quarter |  |
| 3.0           | L1.5   |

For optimal matched precipitation use the suggested nozzle when the indicated pattern is set.

\*All Precipitation rates were calculated using 180° operation. The precipitation rate for 360° of operation would be half of the value in the table.

| Nozzle | AVERAGE         |                |             |                     |          |
|--------|-----------------|----------------|-------------|---------------------|----------|
