

Rain Bird® ESP-Me Controller

Take simplicity to more places.

INTRODUCING THE ESP-Me eNHANCED MODULAR CONTROLLER.

With residential and light commercial versatility, it's the only controller you'll ever need.

We've made a good thing even better. Building on its predecessor—the ESP Modular—the enhanced Rain Bird® ESP-Me offers legendary Extra Simple Programming, the highest station count in its class and new features so easy to use, you'll actually use them. With the freedom to install the same controller on a variety of sites, you will grow your customer base like never before.

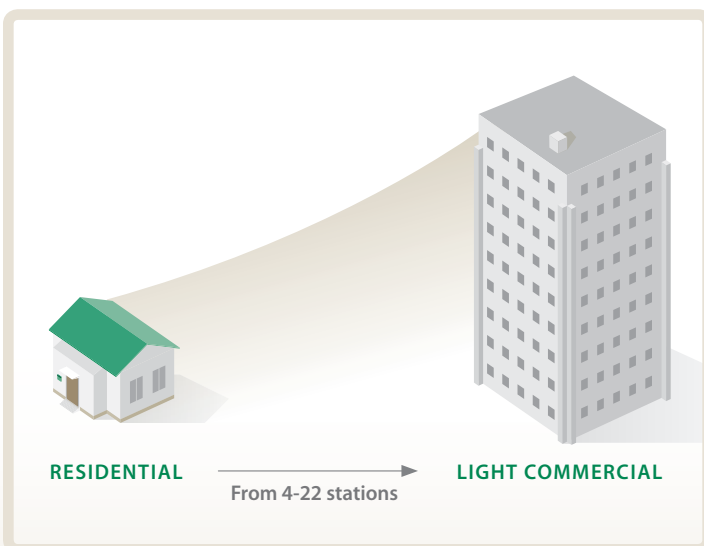

NEW LOOK. NEW NAME. SAME SIMPLICITY.

With vibrant colors, simple-to-read text and a bright LCD display, the new ESP-Me is easy on the eyes. And it's even easier to program.

MORE STATIONS. MORE SITES. MORE SAVINGS.

With 4- to 22-station scalability, the Rain Bird® ESP-Me can help you serve a wide range of customers, from residential to light commercial.

As your station count increases, so do your savings.

The high station count of the new ESP-Me makes it the absolute best value in the industry. The more stations you add to the ESP-Me, the more money you and your customers save versus competitive controllers.

Handle a wide range of jobs with a single controller.

Your crew can now install the same controller on a variety of job sites, saving you time and labor, while reducing your callbacks.

Fewer parts means money in your pocket.

Handle any job up to 22 stations with just a few parts—the ESP-Me controller, 3- and 6-station expansion modules.

Expand your customer base with 4- to 22-station flexibility.

Choose from 6- or 3-station modules.

Save time with legendary Extra Simple Programming.

Extra Simple Programming makes it easy for your crew and even homeowners to tailor a watering schedule to each landscape's unique needs. With the controller up and running more quickly, you'll be moving on to the next job sooner than you think.

Rest assured with proven Rain Bird performance.

The ESP-Me delivers reliability that you and your customers can trust. Fewer callbacks mean more referrals and time for you to focus on growing your business.

FEATURES SO USABLE, YOU'LL ACTUALLY USE THEM.

The best features in the world aren't much good if they never get used. The functionality we've added to the ESP-Me isn't there to take up space. It's there to make your job easier, while providing your customers worry-free operation.

DELAY WATERING

Is Mother Nature doing the watering for you? Are you having a party and want to make sure the landscape is dry? Easily postpone irrigation for up to 14 days.

SEASONAL ADJUST BY PROGRAM

To reduce or increase watering, apply the Seasonal Adjust feature to all programs or each program individually.

BYPASS RAIN SENSOR BY STATION

Got a landscaped area under an eave or deck? Bypass the rain sensor for that station(s)—or for the entire landscape.

TOTAL RUN TIME CALCULATOR

Use this feature to calculate the total number of minutes the controller is scheduled to run for the first start time of any program.

ONE-TOUCH WATERING

Need an easy way to turn the system on? The ESP-Me offers One-Touch Watering. With the dial in the AUTO position, just press and hold the right tear drop arrow button.

CONTRACTOR DEFAULT™

Prevent callbacks with Contractor Default™. Save your programs after installation and setup. If the original watering schedule is overwritten in error, easily restore it in just two easy steps.
